WILSON ROUSES ENTHUSIASM OF MISSOURI CROWD

Thousands Join in Singing National Anthem, and Many are Moved to Tears

(Associated Press by Federal Wireles)
KANSAS CITY, Mo., Feb. 3.—"I believe now, after what I have seen, that the United States need only call for volunteers to raise half a million men in almost any state," declared President Wilson, at the conclusion of an intensely enthusiastic meeting held here last night.

The President devoted the early portion of his address to outlining the inadequacies of the existing army and navy and in explaining the naval and military programs of Secretary Garrison and Secretary Daniels.

Audience Moved to Tears.
At the conclusion of his address the President asked the throng to join with him in singing "America" and the national anthem came in response to the request as a grand chorus, during the singing of which many broke into tears. All stood while singing and the cheering and waving at the conclusion was tumultuous, while from the start the meeting had been plain in its sympathy with the speaker.

After watching the cheering crowd for some minutes, the President held up his hand for silence. When the cheering ceased, in order to hear what came the head of the nation and to say, the President spoke:

Half Million From Each State.
"Why, do you know that there are today men in Washington seriously questioning whether or not we could get the 500,000 for our continental army, which the government is asking. What do you think? Would that many volunteer?"

One man in the audience shouted "Yes," and in an instant the crowd was again in an uproar, echoing this affirmative and shouting their agreement.

"I believe now," shouted the President, "after what I have seen, that the United States need only call for volunteers to raise half a million men in almost any state."

MAJ. BROADBENT WILL BE COLONEL ON GARDEN ISLE

Officers for the new regiment of National Guard which is to be formed on Kauai, and which will be composed of the present companies of the 3rd Infantry, which will be transferred, and new companies to be organized, have been selected by the adjutant-general. Maj. E. H. W. Broadbent will be promoted to colonel and placed in command of the regiment. First Lieut. L. D. Timmons, now battalion adjutant, will be made lieutenant-colonel. Capt. W. H. Rice will be promoted to major. These appointments will be made after the new companies are formed, the officers remaining in their present rank until then.

W. D. McBryde and B. W. Baldwin were today appointed to the rank of major, and will be assigned to the new regiment after it is formed. In the meantime they will be attached to the 3rd Regiment and will aid in organizing new companies.

BRITAIN PERMITS IMPORTATION OF SUGAR BEET SEED

(Associated Press by Federal Wireles)
WASHINGTON, D. C., Feb. 3.—It was announced by the state department last night that Great Britain has agreed with the United States to permit the prompt transportation from Rotterdam of a large quantity of sugar beet seed, which has been brought to that shipping point from Austria, billed to American importers. The British have agreed to put no obstacle in the way of this transshipment.

WILL MEET FRIDAY NIGHT TO DISCUSS PUBLIC UTILITIES

Representatives of the local gas and electric companies are to be invited to confer with the public utilities commissioners at a meeting next Friday evening for the purpose of discussing the two utilities acts now before Congress and the amendments that have been made to them.

Reports of accidents were read yesterday afternoon at the meeting of the commission. One accident on the steamer Shoshone resulted fatally. Much improvement in the service of the Hawaii Telephone Company has been noted of late according to residents of the Big Island who have reported to Commissioner J. N. S. Williams.

VILLA IS SEEKING SAFETY BURDENED WITH RICH LOOT

Reported Making for Border Line With Carranza Troops in Hot Chase

(Associated Press by Federal Wireles)
EL PASO, Texas, Feb. 3.—Reports from Mexico declare that Gen. Villa with several hundred men and a pack train burdened with gold bullion, is moving toward the border from the direction of Chihuahua. Carranza troops are reported to be close on his trail and other columns are said to be closing in to shut him off from the boundary line, where a large force of American cavalry is on guard.

THINKS LURE OF HAWAII GETS IN VISITORS' BLOOD

"I really cannot tell you the reason why I have come back to Hawaii," says E. L. Parker, a prominent attorney of Buffalo, N. Y., who is a dyed-in-the-wool member of the Come Back Club. "That may sound like a peculiar statement, but nevertheless it is true. The fact that I have come here again is sufficient."

"I imagine that most people tell you that they come here because they like the climate, the people and the scenery, and thousands of other attractions that draw people to these beautiful islands. I have tried to think of a direct answer to the question of why I returned to Hawaii after my visit here last year, but I always sum it up with a combination of different things."

"It must be a lure that gets into the blood, or a combination of all the beauties that you find in other climes, plus the personality of the hospitable people you have here. I intend to stay here until May or until I absolutely have to be back in Buffalo, come alone last year, but this year I have brought my daughter with me."

IN WAR ARENA

FRENCH CAPTURE LENS:
SLAVS BEATEN AT STYR RIVER.
LONDON, Eng., Feb. 3.—Lens has been captured in the last fierce French attack, the Germans who have been holding the city ever since early in the war having been forced out by the terrific bombardment and subsequent infantry attacks of their foes.

Save for this and the heavy bombardment in the Champagne region, and the artillery fighting in the region of St. Die, there has been a comparative lull on most of the battle fronts, due in part to the severity of the weather.

Berlin reports that on the eastern front her troops have been successful in an engagement with the Russians between the rivers Styr and Stoodh. The Slavs are said to have been severely defeated by the Teutonic forces.

TEUTONS DENY ZEPPELIN RAIDS ARE REPRISALS

BERLIN, February 3.—Official denials were made yesterday of the reports in circulation that the recent Zeppelin raid against the Midlands section of England was carried out by way of reprisal for the killing of members of a German submarine crew on the orders of the British commander of the British auxiliary Haralong.

The raid, says an official report, was not made as a measure of reprisal but as a military measure, the Midlands section being attacked because it is the center of the British munition industry.

GERMANY COMMANDEERS TEXTILE MANUFACTURES

LONDON, England, Feb. 3.—A Reuters despatch from Amsterdam announces that the German government has just ordered the confiscation of most of the products of the textile industry of that country for "military reasons."

MORE MEN THAN WOMEN HAVE APPENDICITIS

Surgeons state men are slightly more subject to appendicitis than women. Honolulu people should know that a few doses of simple buckthorn bark, glycerine, etc., as mixed in Adler-ika, often relieve or prevent appendicitis. This mixture removes such surprising foul matter that ONE SPOONFUL relieves almost ANY CASE constipation, sour stomach or gas. The INSTANT, easy action of Adler-ika is surprising. The Hollister Drug Company.—Adv.

U. S. Consul Edward Higgins at Stuttgart was to leave his post in February, having become persona non grata to Germany for alleged pro-British utterances. Ambassador Gerard was asked by the state department at Washington to investigate the charge.

Remarkable Photo Shows Zeppelin High Over London

Above is shown an official photograph of a Zeppelin over London ready to drop bombs on the darkened city, from which several lines of searchlight are directed at the floating enemy. The light from bursting bombs around the airship may be faintly seen.

WAKEFIELDS SAY GREAT NUMBER OF GERMANS DYING IN PRISONS

Horrors of Siberian Detention Camps are Described By Honeymongers

Completing a honeymoon which began in Honolulu and which lasted several months, Mr. and Mrs. F. W. Wakefield, the latter having been the divorced wife of Jack Spreckels, have returned to San Francisco, where they will make their home. Incidentally, the Wakefields brought back with them stories of the horrors of the Siberian detention camps, one of which is given herewith.

The Wakefields were married in Honolulu early last fall, both having journeyed here expressly for the ceremony. Mrs. Spreckels' arrival here was followed by a lively little affair wherein she was forced to part with a tiny lap dog after she had smuggled the animal into the city and been chased to the Seaside hotel by a wharf officer.

The San Francisco Bulletin of January 25 gives the Wakefields' description of the detention camps in Siberia as follows:

Privations Terrible.
"Bringing a story of almost unbelievable suffering and privation among the German and Austrian prisoners of Russia in Siberia, F. W. Wakefield, multimillionaire clubman and engineer of this city, whose wedding to the divorced wife of Jack Spreckels in Honolulu took place on the day Spreckels' interlocutory decree was made final, arrived in port on the T. K. K. liner Shinjo Maru with Mrs. Wakefield.

"Although Wakefield was sent on a special engineering mission for the Russian government itself, and was therefore able to see far more of actual conditions in the Siberian camps than could a tourist without the highest Russian credentials, he expressed himself as horrified at the plight of the Teutons.

"There are approximately 900,000 German and Austrian captives in Siberia, he says. All are hungry, all are suffering from the bitter cold, and the death rate in the camps is enormous.

"In many of the camps Wakefield found the prisoners without any blankets whatever, sleeping on the frozen ground with the thermometer in some cases at 40 degrees below zero. Their sole food was a Russian dish composed of chopped cabbage. The water supply was a filthy inadequate, and sanitary conditions Wakefield found to be shocking.

"As a result of the hardships undergone by prisoners, 10 per cent have died from hunger and thirst. An example of the awful death rate in these camps is cited at Tekhta, which is located at the junction of the Amur River railroad and the Trans-Siberian railroad. In a camp of about 40,000 prisoners there, during the seven days Wakefield remained, 2000 prisoners died.

Accuses Government.
"Wakefield says the Russian govern-

ment is not to blame for the conditions in the camps. The government is doing all it can, but that is pitifully little. It is unable to get any food into the region, because of the shortage of shipping, and its hands are tied.

"Wakefield encountered two American Red Cross workers, named Ames and Winfield, doing herculean work, which, however, was wholly inadequate because of the great need of the prisoners.

Helps Prisoners Escape.
"Roy Du Fais, a German aviator, who was a prisoner of the Slavs, arrived on the steamer Shinjo Maru. Du Fais was able to escape from the prison camp with the aid of Wakefield, who was touring through there.

"Du Fais himself denies that he was ever in the German aviation corps, or that he was a prisoner in Siberia. Any questions put to him concerning his career are passed off with a laugh. The only thing he will say is that he is a Swiss citizen. He appears to have come from nowhere, and is going to the same place, by his own admissions.

Wakefield Helped Captive.
"Wakefield, however, was a little more talkative, and said that Du Fais had been smuggled out of one of the detention camps by himself and another man. He said that the young German aviator had been a student at the Heidelberg University in Germany at the outbreak of the war, and immediately left his studies to enlist in the aviation corps. He performed many wonderful flights and did valuable scout work for the German army, and several times narrowly escaped death from the French aviation guns, which on one occasion rendered the wings of his aeroplane like the top of a pepper shaker.

Winged by Slavs.
"The young aviator was finally brought down by a Russian gun when the Germans made their first advance on Warsaw. He was captured by the Russians, his aeroplane destroyed, and he was taken to the detention camp at Tekhta. Here he was found by Wakefield, who took an interest in the young man and devised means for his escape.

"As to where Du Fais will now go is a matter of conjecture, as he and Wakefield refused to comment upon his future movements."

SUGAR BEET GROWERS IN OREGON TO BUILD MILL

(Associated Press by Federal Wireles)
GRANTS PASS, Ore., Feb. 3.—With the assurance that there will be continued tariff protection upon domestic sugar, the Oregon and Utah Sugar Company has signed the contract for the construction of a beet sugar factory here, which is to be completed in time to handle the 1916 crop. Growing contracts with a large number of beet growers and farmers of the locality have already been closed. The factory will have a crushing capacity of between 600 and 800 tons of beets daily.

FILIPINO BILL PASSES SENATE BY CLOSE VOTE

Casting Ballot of Chairman Pledges Upper Body to Give Islands Independence

(Associated Press by Federal Wireles)
WASHINGTON, D. C., Feb. 3.—By the vote of Vice-President Marshall, presiding officer, the senate yesterday passed the Philippines Bill, as amended by Senator Clarke, which pledges the United States to grant independence to the Philippines not sooner than two years and not longer than four years, pending the negotiation of an international agreement guaranteeing the integrity of the Philippines Republic.

Vote Nonpartisan.
The opposition fought to the last to defeat the administration measure, which, however, was not decided on partisan lines. Of the 56 Democratic senators, 41 voted for the bill and 15 against. Of the 40 Republican senators, seven voted for the measure with the Democratic majority and 33 opposed it.

Senator Cummins introduced an amendment to the bill which provided that the question of independence be left to the people of the Philippines, to be decided by a plebiscite, at which all the varied races in the islands could vote on the question of whether or not they wanted to establish an independent republic. This amendment was rejected.

MOST EMINENT MEDICAL AUTHORITIES ENDORSE IT

A New Remedy for Kidney, Bladder and All Urine Acid Troubles.

Dr. Eberle and Dr. Braithwaite as well as Dr. Simon—all distinguished authors—agree that whatever may be the disease, the urine seldom fails in furnishing us with a clue to the principles upon which it is to be treated, and accurate knowledge concerning the nature of disease can thus be obtained. If backache, scalding urine or frequent urination bother or distress you, or if uric acid in the blood has caused rheumatism, gout or sciatica, or you suspect kidney or bladder trouble just write Dr. Pierce at the Surgical Institute, Buffalo, N. Y.; send a sample of urine and describe symptoms. You will receive free medical advice after Dr. Pierce's chemist has examined the urine—this will be done without charge, and you will be under no obligation. Dr. Pierce, during many years of experimentation, has discovered a new remedy which is 37 times more powerful than lith in removing uric acid from the system. If you are suffering from backache or the pains of rheumatism, go to your best druggist and ask for a 50-cent box or "An-uric" put up by Dr. Pierce. Dr. Pierce's Favorite Prescription for weak women and Dr. Pierce's Golden Medical Discovery for the blood have been favorably known for the past 40 years and more. They are standard remedies today—as well as Dr. Pierce's Pleasant Pellets for the liver and bowels. You can have a sample of any one of these remedies in tablet form by writing Dr. Pierce.—Adv.

MORGAN TO BRITAIN ON SECRET MISSION

(Associated Press by Federal Wireles)
NEW YORK, N. Y., Feb. 3.—J. Pierpont Morgan, accompanied by Benjamin Strong, governor of the federal reserve bank of New York, left here yesterday for England, on a secret mission. It is reported that the two financiers are going to Great Britain in connection with a new allied loan, reports of which have been bruited about Wall street and financial centers for some time past, but about which nothing official has been made public.

CREW OF TAKATA MARU ABANDONS SHIP AT SEA

NEW YORK, N. Y., Feb. 3.—Wireless reports from the American tanker Silver Shell, off Newfoundland, announce that the Japanese steamer Takata Maru, which collided with the tanker on Monday night, has been abandoned, being unsafe and beyond possibility of saving. The crew of the Takata has been transferred to the Silver Shell. No details of the collision have as yet been received.

TWINKLING LIGHTS TO SOON CALL POLICEMEN

Lights set on the intersections of principal streets on the beats of police officers in Honolulu will twinkle at the pressing of a button in the police station, and call the officer to the box when the new Gamewell system is installed. This plan is adopted so police headquarters can easily get in touch with officers on various beats. The Gamewell board and desk is now being installed and will be working in a few days. It is the latest and most convenient system of police alarms.

J. J. Wood of Port Wayne, Ind., millionaire and inventor of the Wood electrical system, 59 years old and three times married with a divorce lately registered, recently took out a license to marry Nellie Scott, 24 years old.

CANE CUTTERS IN PORTO RICO MAKE THREATS

Danger of Strike and Unsettled Conditions Limit Sugar Offerings From Island

Steady buying orders from Europe, buying by mainland refiners, and a limitation of offerings from Porto Rico because of labor troubles threatening with cane cutters all combined in the week prior to January 21 to stiffen sugar prices, says the Nevess & Callaghan Sugar Market Review, issued January 21 from 99 Wall street. The resume follows:

"Confirmation of steady f.o.b. buying in Cuba for European account, coupled with the persistent demand for refined here and for export to various countries, added strength to the market early in the week. Refiners found it necessary to buy raws to cover their export commitments and their purchase of Cubas for January shipment and clearance at 3 9-16c basis 96° c.f., caused sellers to become firmer in their views and to ask higher prices.

"Sales of two small cargoes of Cubas, one to an outport refiner for January clearance with specified date at 3 3/4c, and the other to a local refiner for prompt clearance at 3 19-32c basis 96° c.f., was followed by moderately large sales locally of Cubas for late January and early February at 3 3/4c basis 96° c.f., which cleared the market of all offerings in these positions at this price. These sales made an advance of 1/8c over prices prevailing at the close of last week and induced confidence in the market on the part of dealers in refined, who began placing orders for refined to replenish their depleted stocks. This buying of refined for domestic use at a time when refiners' melting supplies were so low, added new stimulus to the market and a fairly general buying movement developed.

"Following small sales of February shipment Cubas at 3 11-16c, refiners bid the market up on January and February at 3 23-32c and accepted all offerings at this price, and finally to 3 3/4c basis 96° c.f. before any large line of sugar appeared. Sales at 3 3/4c for January and February amounted to about 200,000 bags and cleaned up all offerings in these positions. Bids of 3 3/4c for both March and April failed to find sellers, the uncertainty of the tonnage situation being the restraining factor.

"Holders of January and February endeavored to force another 1-16c advance in price for the few sugars that appeared thereafter, and although they were successful in obtaining 3 13-16c basis 96° c. & f., or its equivalent from outside buyers for three small parcels, two for January shipment and one from store, yet further offerings of January shipment at 3 13-16c could not be sold to refiners at this price, as the domestic demand for refined had been covered and refiners consequently did not feel encouraged. Sellers then lowered their ideas to 3 3/4c and large sales, totaling some 250,000 bags of January and February shipments Cubas, were effected at 3 3/4c basis 96° c.f.

"Owing to unsettled labor conditions and prospects of strikes among the cane-cutters in Porto Rico, holders of these sugars have hesitated about offering sugars not already manufactured. In consequence, the offerings of these sugars have been limited. A sale, early in the week, of 10,000 bags of Porto Ricos for late January-early February clearance at 4 3/4c basis 96° c.f. was followed by sales of 17,000 bags for early February clearance at 4 6/4c basis 96° c.f., clearing up only offerings of Porto Ricos that were on the market during the week.

"The weekly cable on Tuesday from Cuba reported receipts of 94,523 tons and 155 Centrals grinding, as compared to 48,000 tons receipts and 135 centrals at work at the corresponding date last year. Today 163 centrals are in operation and the weather is favorable.

"On account of the improvement in raws, the trade early in the week began placing orders for refined to cover their January and early February requirements, which buying, added to the steady business that was being done by refiners for export, caused them to advance their list price to 5 7/8c less 2%. All refiners were firm at the advance and even refused to accept pre-ordered orders at the old price and these orders were finally placed at the new basis. The business was at times active during the week and probably totaled 500,000 barrels of refined, to which might be added a liberal quantity of beet granulated placed in the Eastern territory. Beet interests that had been quoting 20 points under cane refined are now quoting 5 7/8c less 2%, or 10 points below in the Eastern competitive market. At the close, the domestic demand for refined has been satisfied and the market is quiet."

CONFESSION IMPLICATES CAPT. VON PAPAN IN DYNAMITE CONSPIRACY

LONDON, Eng., Feb. 3.—Bridgman Taylor, who has been detained here for failing to register as an alien enemy, is said to have confessed to the British authorities that Capt. Von Papan, former naval attaché at the German embassy in Washington, was personally the organizer of a plot to dynamite the Welland canal.

INDEMNITY TO COLOMBIA CUT TEN MILLIONS

Senate Committee Recommends Ratification of Treaty, With Apologies

(Associated Press by Federal Wireles)
WASHINGTON, D. C., Feb. 3.—The committee on foreign relations of the senate has reported on the ratification of the long delayed treaty with the Republic of Colombia, which contains an expression of regret on the part taken by the United States in the partition of that republic which resulted in the establishment of the Republic of Panama.

The committee recommends favorable action on this treaty, with the proviso that the amount named in the treaty to be paid by the United States to Colombia as indemnity for the part played in the revolution by the United States navy and as payment for the rights acquired by the United States for the building of the Panama canal be reduced from \$25,000,000 to \$15,000,000.

The committee also recommends the ratification of the Nicaraguan treaty, which proposes to pay to the Republic of Nicaragua the sum of \$3,000,000 for another canal strip and naval station rights on each ocean at the terminal of the strip.

Brig.-gen. Edwards, U. S. A., in command of the troops on the Panama Canal Zone, who is here to report to Congress on the military situation at Panama, has recommended in his report that the United States acquire from the Republic of Panama additional territory at both the Atlantic and Pacific entrances to the canal, in order to increase the safety of that waterway and to permit of the adequate strengthening of the military defenses.

CHURCH ROOFS CRUSHED BY WEIGHT OF SNOW

(Associated Press by Federal Wireles)
SEATTLE, Wash., Feb. 3.—The dome of St. James' Cathedral, one of the largest Catholic churches on the coast, collapsed last night from the weight of snow which had accumulated, unmelting, for several days. The damage is estimated to have been in the neighborhood of \$50,000. The roof of the West Seattle Christian church also collapsed under the accumulation of snow.
